

DENTAL

BAI's self-insured dental plans are cost-effective solutions compared to traditional fully insured dental plans. Employers can design a customizable plan that fits their specific needs and financial goals.

Why pay for a standard premium based on a projection of claims? Our BAI self-insured dental plan allows you to pay *only* for claims that are *actually* incurred.

Most plans include an annual maximum per covered member (usually \$1,000 to \$2,000) that limits your plan's liability. Outside of the claim costs, you'll also pay a low administrative fee per covered employee per month.

Employers can save 20% or more — compared to a fully insured dental plan.

This is a great way to control your costs and offer an exceptional benefit to employees.

The BAI Dental Network includes the majority of dentists throughout northwestern Pennsylvania. We also supplement this with the Dentemax Network for members outside of the local area.
