

VISION

BAI's self-insured vision plans provide a custom-designed benefit plan to employees that covers exams, frames, lenses and contacts. You have the freedom to design a plan with features such as reimbursement limits, eligible expenses, frequencies and more!

Instead of paying a premium per coverage tier, which is based on a projected utilization level, you only pay for vision claims that are actually incurred. Vision benefits are very important for

maintaining good health, but they are one of the most underutilized benefits. A self-insured vision plan may be a great choice for your company. Ask us how!
